

## Best Elevator Door & Brake Monitoring Device

### Car Gate & Door Locks Separation

The updated **FSSG** -SDC version incorporates the capability to separate between Car gate switch from Landing door interlocks circuits, As required when landing door locks and Car gate switch are serially connected.

Thus allowing full compliant with NYC code as far as Door monitoring for such controllers.

As always with **FSSG** , This betterment achieved too without any controller modification , thus allowing the usual **FSSG** swift and easy installation

### FSSG - SDC Version
