

FSP No More Elevator Run with Open Door

FSSG in conjunction with our new OSG system utilize a Rope Gripper as a safety gear to stop car movement in the upward/downward direction in any case of Unintended Car Movement (UCM) and over speeding, OSG is a must only for elevators that do not utilize Rope Gripper but safety gear only

This FSSG Safety Package (FSP) characterized by :

- Ensuring UCM protection for both Failures, Door locks By-Pass, and Brake Failure
- Retain UCM protection active, even with By-pass on door locks
- Ensure Rope Gripper accurate activation. no more false activation, as a result of over sensitivity
- **NEW Brake Monitoring**
- Ensure that No matter what the cause, this elevator will never leave the floor with open door.
